Players in the automotive industry have an extremely diverse requirement in terms of materials, components, and parts that are procured from multiple suppliers resulting in a higher sourcing complexity and gives rise to several procurement challenges. They have multiple suppliers and vendors for the same part to avoid worst case scenarios such as product recalls, defects, and other unfavorable occurrences.

Instead of loading your procurement team with more head counts with varied procurement background, mjunction provides custom solutions to be the extended arm of your existing team, bringing in the technology, experience and the power of consolidation.

To find out how we can put solutions like these to work for you, call us for a detailed discussion on 033 6610 6100 or contactus@mjunction.in
